

# MALDEN RIVER GREENWAY

For generations the Malden River was an industrial waterway walled-off to public use. **The Malden River Greenway Plan** lays out a vision that will transform the river, creating a world-class park system running through the cities of Everett, Malden, and Medford.

The Malden River Greenway intends to provide safe, connected and accessible paths for local residents and visitors along the Malden River.

It will establish an urban greenscape with thriving biodiversity and promote a healthy lifestyle through active design and open space programming.

The development of the Malden River Greenway will become integral to an open space network that provides a key link in the larger regional greenway system.

Extended path provides a safe and direct connection to Malden Center.

On-street bike lanes connect to the expanded riverfront trail system

Pedestrian crossing from the Northern Strand trail to the riverfront.

An extended and enhanced trail network connects the head of the river to Medford Street.

The Wellington Connector provides an off-street path to the river from Malden and Medford.

Iconic pedestrian bridges connect key open spaces on both sides of the river to create a loop system.

A riverfront trail runs through the National Grid site to create a naturalized path and open space.

The proposed parkway creates a park promenade with direct access to the Malden River.

New roadway provides a direct connection to Village Landing Park.

Paths connect under Woods Memorial Bridge on both side of the river.

An extended path system leads through the wetlands to Gateway Park.

Potential Transit Oriented Development at Wellington Station includes a park connected to the greenway.

Northern Strand Trail and Malden River Greenway will connect to the casino and bridge across the river.

- Greenway network
- Naturalized wetland
- Links to proposed bike network
- Existing buildings to be redeveloped
- ▲ Existing water activity
- ▲ Proposed water activity
- Proposed pedestrian bridges
